LIQUID WASTE HAULER PERMIT APPLICATION

Applicant Business Name _____

Business Street Address _____

City _____ State _____ Zip _____

Telephone _____ Fax _____

DEQ License Number _____ Mailing Address, if other than the above:

Street _____

City _____ State _____ Zip _____

Primary Contact _____ Title _____ Telephone _____

Alternate Contact _____ Title _____ Telephone _____

Vehicle Type	Truck #	License #	Capacity/Gallons

Does your facility haul wastes other than domestic septic tank wastes? If yes, please use the space below to list the other types of wastes, where the wastes originate, and where these wastes are disposed. Also, please note whether DEQ granted approval to haul non-domestic septage.

I have personally examined and am familiar with the information contained in this application and believe that the submitted information is true, accurate and complete. In addition, I am aware of the conditions and requirements for using the septic dump facility and agree to meet them at all times. Failure to comply with the conditions may result in the immediate suspension of the authorization and/or possible penalties as outlined in Clean Water Services Rules and Regulations.

Printed Name/Title _____

Signature _____ Date _____

... **RESOLUTION & ORDER #98-26** ...

6.09 Hauled Wastewater

Only hauled septic tank wastewater may be discharged into the public sewer system. Liquid waste haulers must apply for and receive a discharge permit prior to discharging at any of the Agency's plants.

- a. Septic tank waste may be introduced into the POTW only at locations designated by the Agency, and at such times as are established by the Agency. Such waste shall not violate Section 2 of this ordinance or any other requirements established by the Agency. All septic tank waste haulers (liquid waste haulers) shall apply for and obtain a permit prior to disposing of wastes at a designated disposal site.
- b. No person may dispose of hauled industrial waste into the Agency system, except upon prior approval of Oregon DEQ and prior application to USA showing evidence of DEQ approval.
- c. Disposal of unauthorized hauled industrial waste will be cause for permit revocation. Revocation of the permit does not preclude the Agency from taking additional enforcement action including criminal prosecution.
- d. A liquid waste hauler may have its permit suspended, or request for permit denied, if there is an enforcement action or pending enforcement action being taken by either DEQ or another jurisdiction. In the event an enforcement action is taken, the permit suspension may last a minimum of six (6) months. To reinstate a permit at the end of the suspension period, the hauler must apply for a new permit.
- e. Liquid waste haulers may discharge loads only at locations designated by the Agency. No load may be discharged without prior approval of the Agency. The Agency may collect samples of each hauled load to ensure compliance with applicable standards. In addition, the Agency may require the hauler to provide waste analysis of any load prior to disposal.
- f. A load ticket completed by the hauler must be submitted to the Agency prior to disposal. The load ticket must contain the hauler's name, permit number, truck identification, the name and address from the originator of the hauled waste, and the volume and general characteristics of the waste. The form shall also be signed and certified that only domestic waste is being disposed, and that the load does not contain any commercial or industrial process waste.
